OFFICE OF
ECONOMIC
RECOVERY AND
INVESTMENT

AMERICAN RECOVERY AND REINVESTMENT ACT: NORTH CAROLINA YEAR 2 REPORT

A Letter from OERI Director Bob Etheridge:

Governor Perdue created the Office of Economic Recovery and Investment (OERI) immediately following the enactment of the American Recovery and Reinvestment Act (ARRA) on February 17, 2009. She charged OERI with monitoring and guiding the best use of ARRA funds and ensuring transparent, accountable and efficient handling of federal recovery funds and state-level economic recovery initiatives.

As North Carolinians faced high unemployment during a historic economic recession, unparalleled since the Great Depression, OERI has worked to raise awareness of ARRA opportunities, monitor entities utilizing ARRA funds in North Carolina, ensure fair and competitive use of funds, and strived to ensure that jobs were created in new and innovative fields so that North Carolina would continue to be a competitive force in the global economy. With approximately \$16.5 billion in economic impact coming to North Carolina, \$10.5 billion of which passed through state agencies, the challenges have been great, but the successes were even greater, and they continue to grow.

The purpose of this Year 2 Report is to highlight the many programs and people in North Carolina touched by ARRA and to provide examples of the opportunities the ARRA created in our state. As the various funding programs reach completion deadlines, the work of OERI continues. OERI's shift from outreach activities and guiding opportunities to accountability and compliance management will continue for the duration of the legislation's programs, some of which (i.e. Race to the Top) will last until 2014.

As we face the coming budget years without the benefit of ARRA funds, OERI continues to be the state watchdog for the numerous programs still using this funding. Minimizing fraud, waste and abuse of these funds is of utmost importance to this office. As we shepherd North Carolina through the remaining months under ARRA, our office will continue the focused oversight responsibilities of this office to ensure that our state reaps the maximum benefit from this landmark financial legislation.

Sincerely,

A handwritten signature in black ink, appearing to read "Bob Etheridge", with a long horizontal line extending to the right.

Bob Etheridge, Director
Office of Economic Recovery and Investment

Introduction

The American Recovery and Reinvestment Act (Public Law 111-5) was signed into law on February 17, 2009. It was an unprecedented effort to jumpstart our economy, create and save millions of jobs and place a down payment on long-neglected challenges facing our nation in the 21st century. The Act represented an estimated investment of \$787 billion, two-thirds in infrastructure investments, benefits, programmatic and direct grant provisions, and an additional 1/3rd that included tax cuts, rebates, incentives, and bond provisions.

The ARRA had five primary policy goals described in the opening provisions of the bill:

- To preserve and create jobs and promote economic recovery.
- To assist those most impacted by the recession.
- To provide investments needed to increase economic efficiency by spurring technological advances in science and health.
- To invest in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits.
- To stabilize state and local government budgets in order to minimize and avoid reductions in essential services and counterproductive state and local tax increases.

The ARRA was designed as a short-term program with short, medium, and long-term goals. February 17, 2011 marked the second anniversary of the signing of the Act, and while some programs, such as Race to the Top or High Speed Rail, will continue into 2014 and beyond, most programs should be complete by the end of the Act's third anniversary.

To oversee and coordinate ARRA spending, Governor Perdue established the Office of Economic Recovery and Investment (OERI). OERI acts as the coordinator and primary responsible state entity for North Carolina's Recovery Act efforts. The office works with state agencies administering ARRA funds and reviews state applications for federal grants. OERI is the central point of contact for the federal oversight agencies, the White House's Office of Management and Budget (OMB) and the General Accounting Office (GAO). The office also coordinates state reporting efforts and works with state agencies, local governments and other public and private entities to identify ARRA funding opportunities. The OERI website, www.ncrecovery.gov is the central hub for information regarding ARRA awards, spending and accountability in North Carolina.

The Act was signed, and OERI was established by Governor Perdue, in mid-February, 2009. However, due to requirements at the state and federal level for certifications, guidance documents issued by federal agencies, and other required administrative tasks, the first Recovery funding did not reach North Carolina until early April 2009. It is on the second anniversary of the actual operation of ARRA that OERI issues the following report on the current disposition of programs and a survey of the impacts the ARRA has had to date in North Carolina.

North Carolina Funding Impact Overview

Initial projections of North Carolina's state government share of ARRA spending were approximately \$6.3 billion. This number was based on historical data of programs funded through the Recovery Act and the statutory language of the ARRA, and included only programs funded by formula and entitlements. No competitive grants were included in this initial figure.

As of the latest federal report (4th Quarter 2010), public and private entities and individuals in North Carolina have received approximately \$16.5 billion in total ARRA economic impact (not including tax cuts).

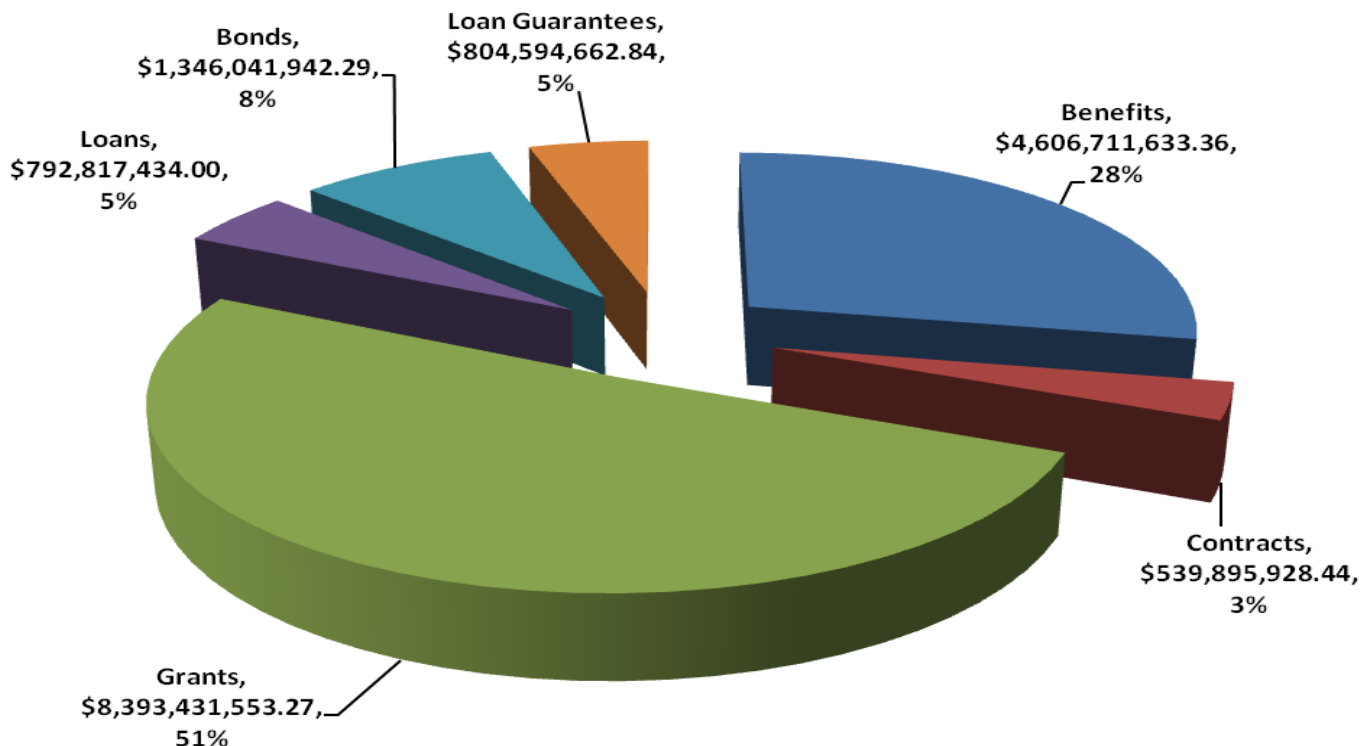

Figure 1: Total North Carolina ARRA Funding by Type

The State Government of North Carolina is the single largest recipient of ARRA funding in this state, although a large portion of this amount includes dollars that pass directly to individuals and local governments. To date, the State of North Carolina has received awards and distributed benefits worth more than \$10.6 billion.

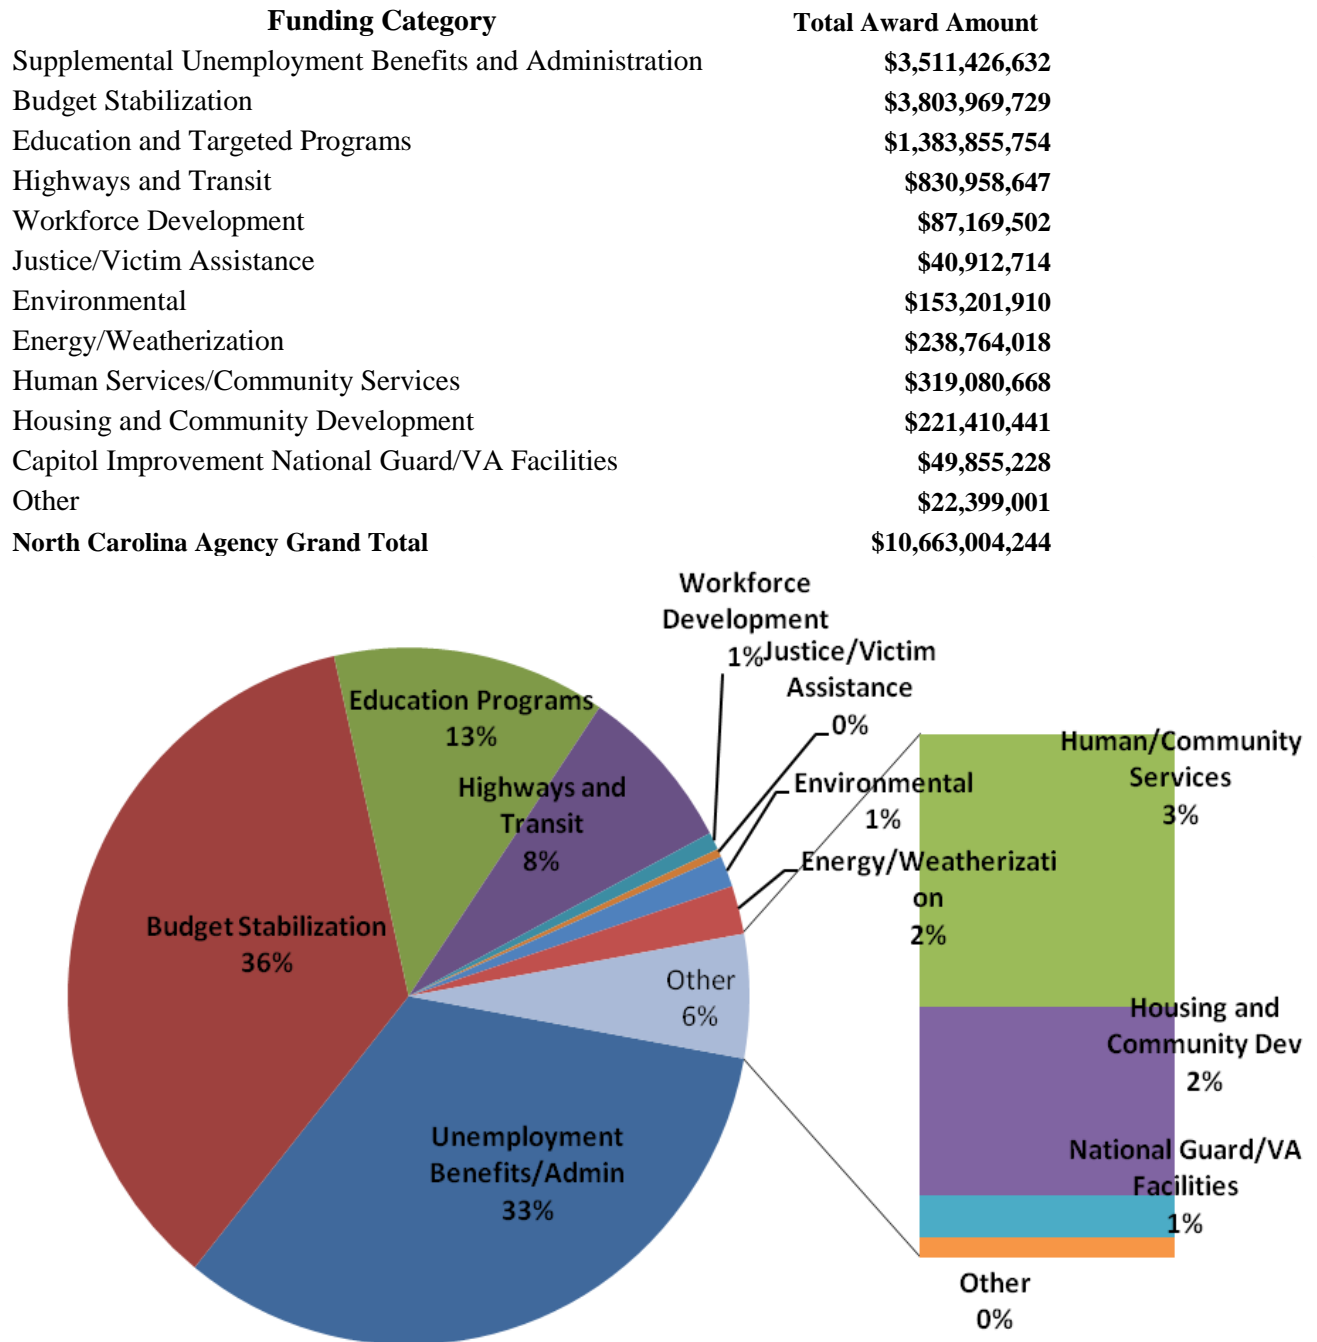

Figure 2: North Carolina State Agency ARRA funding by category

As of March 30, 2011, the State of North Carolina has disbursed more than 84% of its \$10.6 billion in actual ARRA Funding.

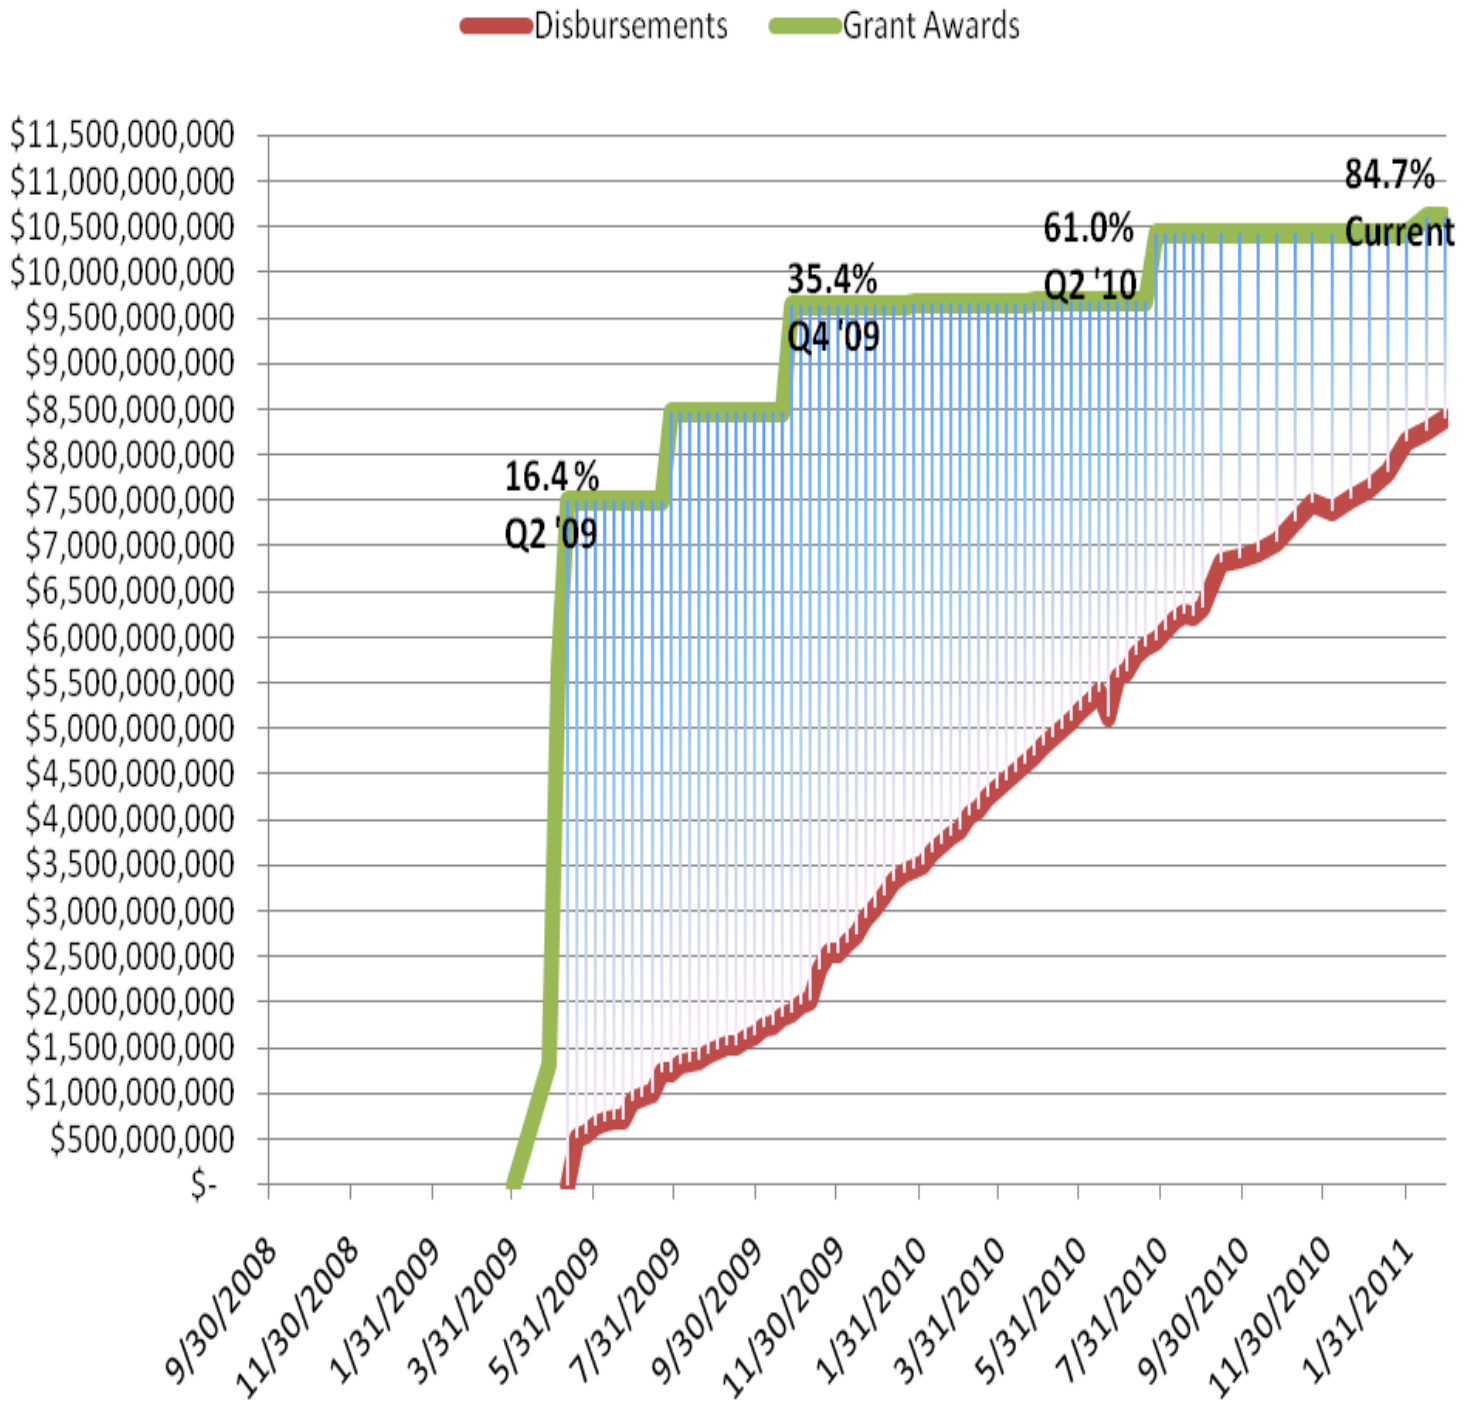

Figure 3: Percentage of Grant Awards Expended over time.

Jobs

The ARRA requires an unprecedented level of transparency and accountability. Every recipient of at least \$25,000 in Recovery Act funding, who is not an individual, must report quarterly to www.federalreporting.gov. These reports must include information on the use of funding, project status, and document any jobs funded with Recovery dollars (see Section 1512 of Public Law 111-5). Individuals who receive benefits funded with ARRA dollars (including unemployment benefit increases, Supplemental Nutrition Assistance Program, Social Security bonuses, and Pell grants), those who receive indirect benefits from ARRA programs (such as increased budgetary flexibility, training, loan guarantees, and revolving funds), and those who benefit from programs in Part B of the ARRA (such as tax credits, increased business depreciation, and bond proceeds) do not contribute to the 1512 report, but their activity still has a positive impact on the economy in North Carolina and can generate job growth.

The recipient reports are compiled and released in several formats on www.recovery.gov within a month of submission.

North Carolina has consistently shown approximately 25,000 jobs, as reported on www.recovery.gov, funded through the ARRA. North Carolina has consistently been in the top 10 states for absolute jobs, per capita jobs, and per dollar jobs created with Recovery funding.

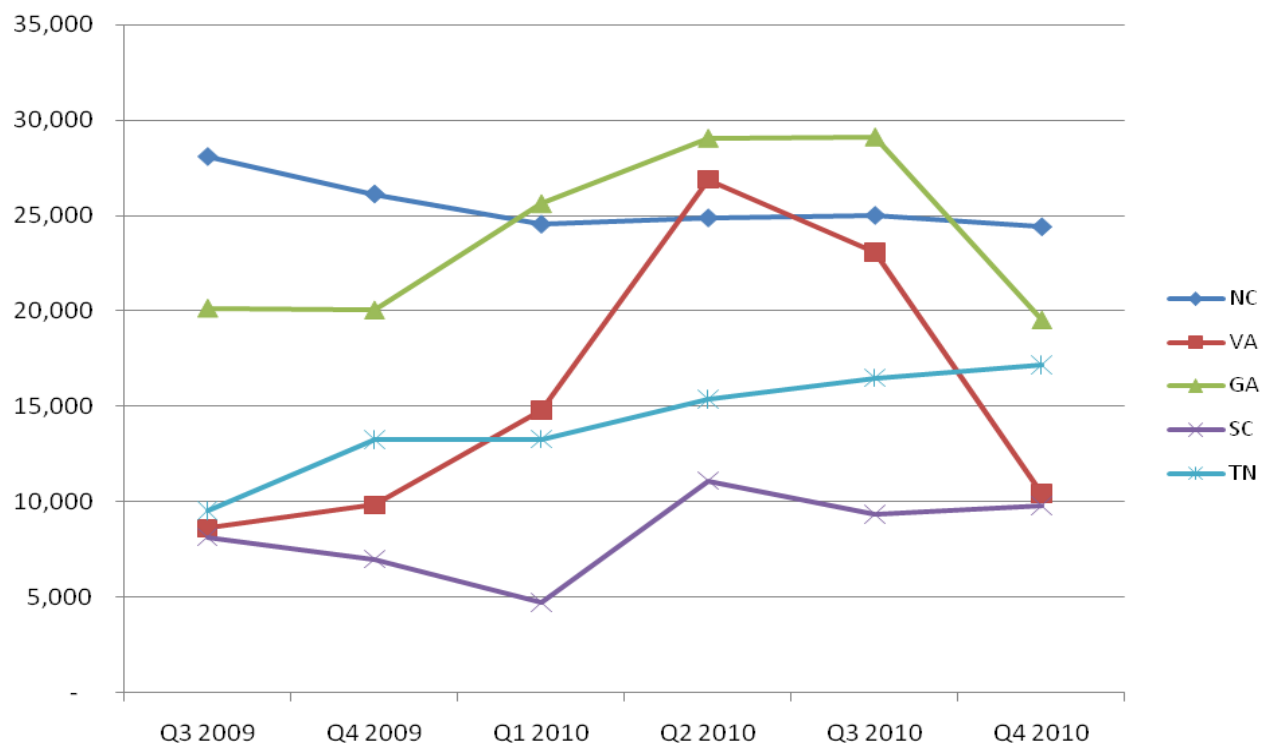

Figure 4: 1512 reported Job Creation, southeastern states

The following sections of this report highlight some of American Recovery and Reinvestment Act's impacts in North Carolina. The efforts under the Recovery Act assist those impacted by the current economic recession and establish projects to modernize, renew, and rebuild North Carolina communities across the state. The following programs are state projects, local projects, and competitive grants won by nonprofits and private business, designed to move North Carolina forward and take advantage of the historic opportunity presented by the American Recovery and Reinvestment Act.

North Carolina Invests in High Speed Broadband

High-speed internet, also known as broadband, is one of the great infrastructure challenges and developments of the 21st century. By investing in broadband, the ARRA is laying the groundwork for sustainable economic growth, well-paying jobs, and global competitiveness. Like other widespread technological advances, broadband is an enabling technology that will allow for innovations that today cannot be anticipated. These investments have the potential to be transformative. They will create a platform for innovation and entrepreneurship across all sectors of the economy and address many of the state's priorities including health care, education, small business, and public safety.

North Carolina is a national leader in broadband. Of the two broadband programs funded through the Recovery Act, the Broadband Initiatives Program (BIP) and the Broadband Technology Opportunities Program (BTOP), North Carolina ranked fourth nationally in the award of projects. These range from large statewide programs, such as MCNC's two BTOP awards to smaller community-specific awards, such as the Mitchell County Courthouse public computer center project, and includes targeted community educational programs, such as the distance education grant to North Carolina Central University Law School.

MCNC

MCNC, a nonprofit, operates NCREN, the North Carolina Research and Educational Network. NCREN connects all public and charter schools, the UNC system, local libraries, and various other community anchor institutions, such as public safety and public health centers. While MCNC is an independent organization, it receives funding from North Carolina state government, and charges individual institutions for the use of the network. With the Recovery Act, MCNC saw a unique opportunity to expand NCREN at no cost to the state, improve service to state entities, and save the state money by stabilizing the ever-increasing cost of high-speed internet to public institutions.

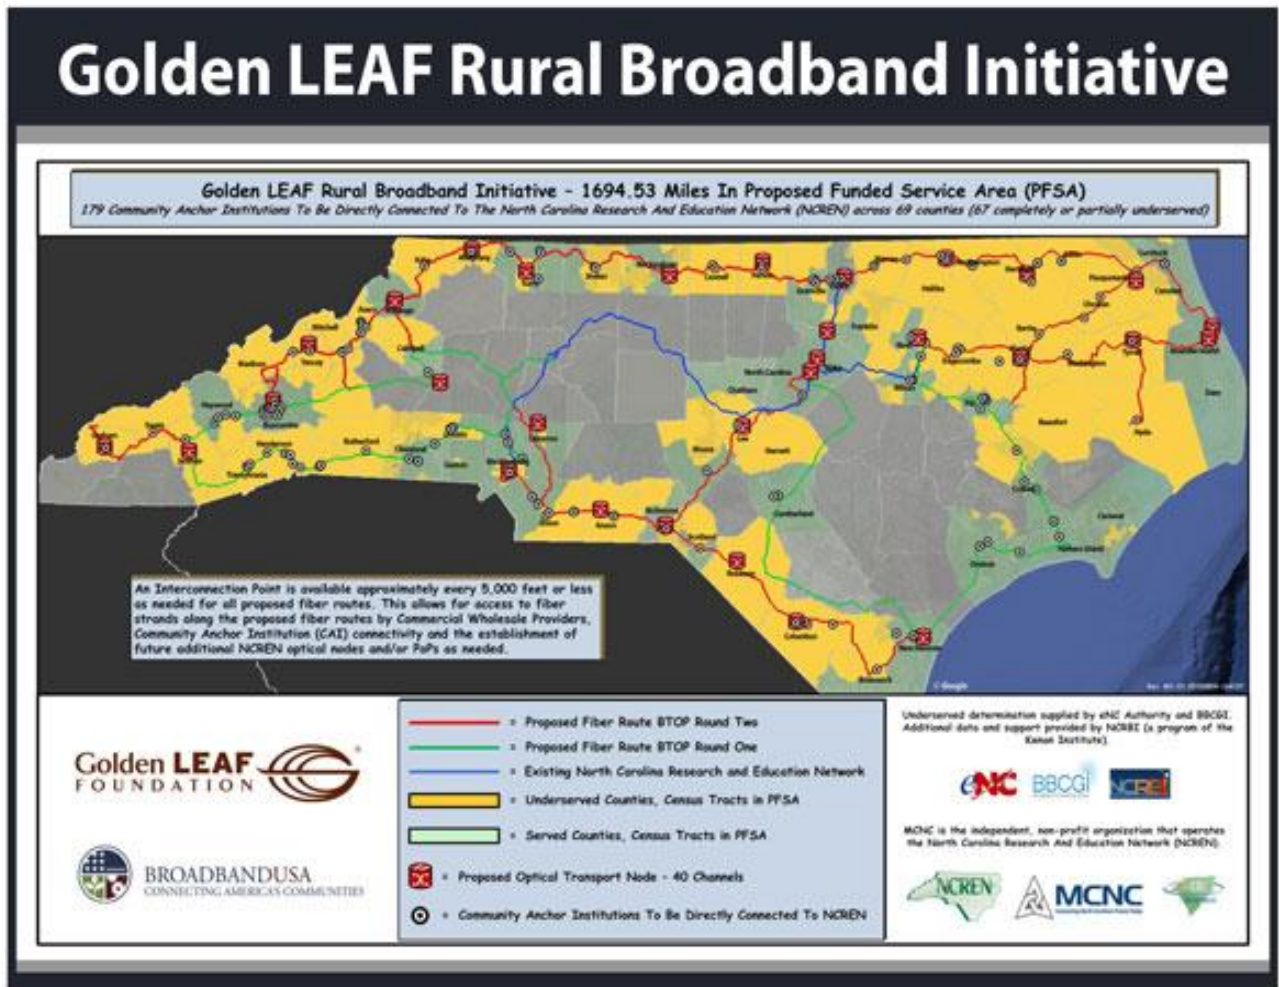

In the first round of the BTOP program MCNC applied for and was awarded \$28.22 million, contributing \$11.76 million in in-cash and in-kind match to ultimately provide \$40 million to expand the middle-mile fiber infrastructure that supports NCREN.

MCNC BTOP Round 1 logo

MCNC's round two program application is known as the Golden LEAF Rural Broadband Initiative (GLRBI). MCNC was awarded \$76 million. The grant was supported by a \$24 million matching grant from the North Carolina Golden Leaf Foundation for a total of \$100 million for the program.

The GLRBI bridges the prosperity gap by delivering broadband infrastructure to rural North Carolina. The project connects both middle mile infrastructure and direct connection to Community Anchor Institutions in the rural northeast, north central, northwest and south central portions of the state. In the 69 counties served by the build, there are 5.9 million residents, and 67 of the 69 counties qualify as underserved under the BTOP rules. The project serves 1,718 K-12 schools, 61 community college main/satellite campuses, 33 baccalaureate degree-granting four-year colleges and universities, 254 public libraries, and 1,887 municipal, county and state public safety facilities. The GLRBI application included over 120 support letters from various counties, elected officials, education leaders, including the Governor and members of the Governor's cabinet.

MCNC's BTOP Round 2 expansion map

“We are embarking on a public-private partnership that will literally change the way North Carolina communicates with the rest of the world. From the mountains to the coast, broadband access is a difference-maker for rural North Carolina. This is a great example of how our state is leading America’s recovery.”

Governor Beverly Perdue.

The \$144 million in funding MCNC secured during BTOP is capital funding. This funding will expand and improve the speed and reliability of NCREN. Projections for the MCNC BTOP Round 1 estimate that the project will create or save 230 jobs. Most of these positions will be contracted from vendors handling various aspects of the build. Round 2 contracts for engineering and construction are projected to create and save more than 1,000 engineering and construction jobs across the state.

Mitchell County Courthouse

The Mitchell County Historic Courthouse Foundation made an application for Round 1 of BTOP to provide for high-speed and Wi-Fi availability in downtown Bakersville, NC, the only location in the county that is a high-speed hotspot.

The project was awarded \$239,194 to upgrade the Mitchell County Virtual Learning and Communications Center and the project plans to double the number of public computer workstations available and provide job training and educational courses through the local community college and extension service. Mayland Community College and the North Carolina Cooperative Extension Service plan to use two new videoconferencing systems provided with grant funds to provide courses and workshops for a broad audience.

The project expects to provide 28 laptops that can be checked out from the courthouse. These will serve over 300 users per week with broadband access and training that will address specific educational and communication needs of displaced workers, farmers, high school dropouts, residents wanting college courses, health care workers, EMS personnel, educators, government officials, and small business owners.

Dr. Daniel Barron and Governor Beverly Perdue at the site of the project

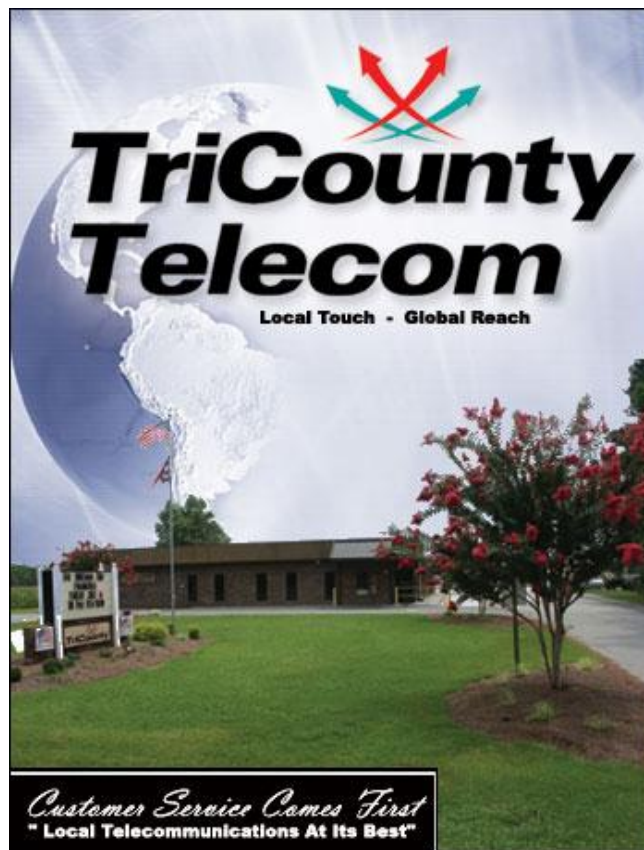

North Carolina Central University Program

NCCU School of Law has a strong history of delivering legal and educational services to economically vulnerable communities. North Carolina Central University's School of Law made a successful application to BTOP for the Virtual Justice Broadband Project to upgrade broadband services and deploy videoconferencing in five legal assistance facilities. In addition, NCCU will expand access to its legal education programs. NCCU Law School was awarded almost \$2 million to serve low-income residents and undergraduates at Legal AID of North Carolina offices at NCCU. The project will also host virtual classes with four Historically Black Colleges and Universities: Elizabeth City State University, Winston-Salem State University, North Carolina A&T University, and Fayetteville State University. The project will fund legal writing seminars for undergraduates to better prepare them for law school, and to increase outreach to ethnic and economic minorities underrepresented in the legal profession. The program also aims to hold introductory law classes for high school students in the region, including expanding its successful "Street Law" project and its annual Legal Eagle Law Camps in Raleigh and Durham public schools.

Tri-County Telephone Membership Co-op.

The Broadband Initiative Program focused on providing money to existing rural providers to expand and improve broadband services. One of the nine BIP recipients in North Carolina was the Tri-County Telephone Membership Co-op.

This approximately \$14.1 million award, matched by more than \$2 million in private contributions, will allow Tri-County Telephone to offer broadband service using advanced technology in northeast Beaufort County and parts of Hyde and Washington Counties. This project will deploy an advanced fiber optic network with inherent capability to deliver broadband service speeds of 80 Mbps. Approximately 10,780 people stand to benefit, as do roughly 889 businesses and 32 community institutions. In addition to the more than 27 jobs the company estimates this project will create upfront, it will provide a foundation for economic growth and job creation for decades.

North Carolina Healthier because of the Recovery Act

The State of North Carolina received over \$300 million for health and community services through the Recovery Act. That funding flowed through a number of programs at both the state and local level. The North Carolina Department of Health and Human Services manages programs that received and expended nearly \$250 million dollars, which North Carolina used to provide citizens with help for their health care, and other human service needs during the recession.

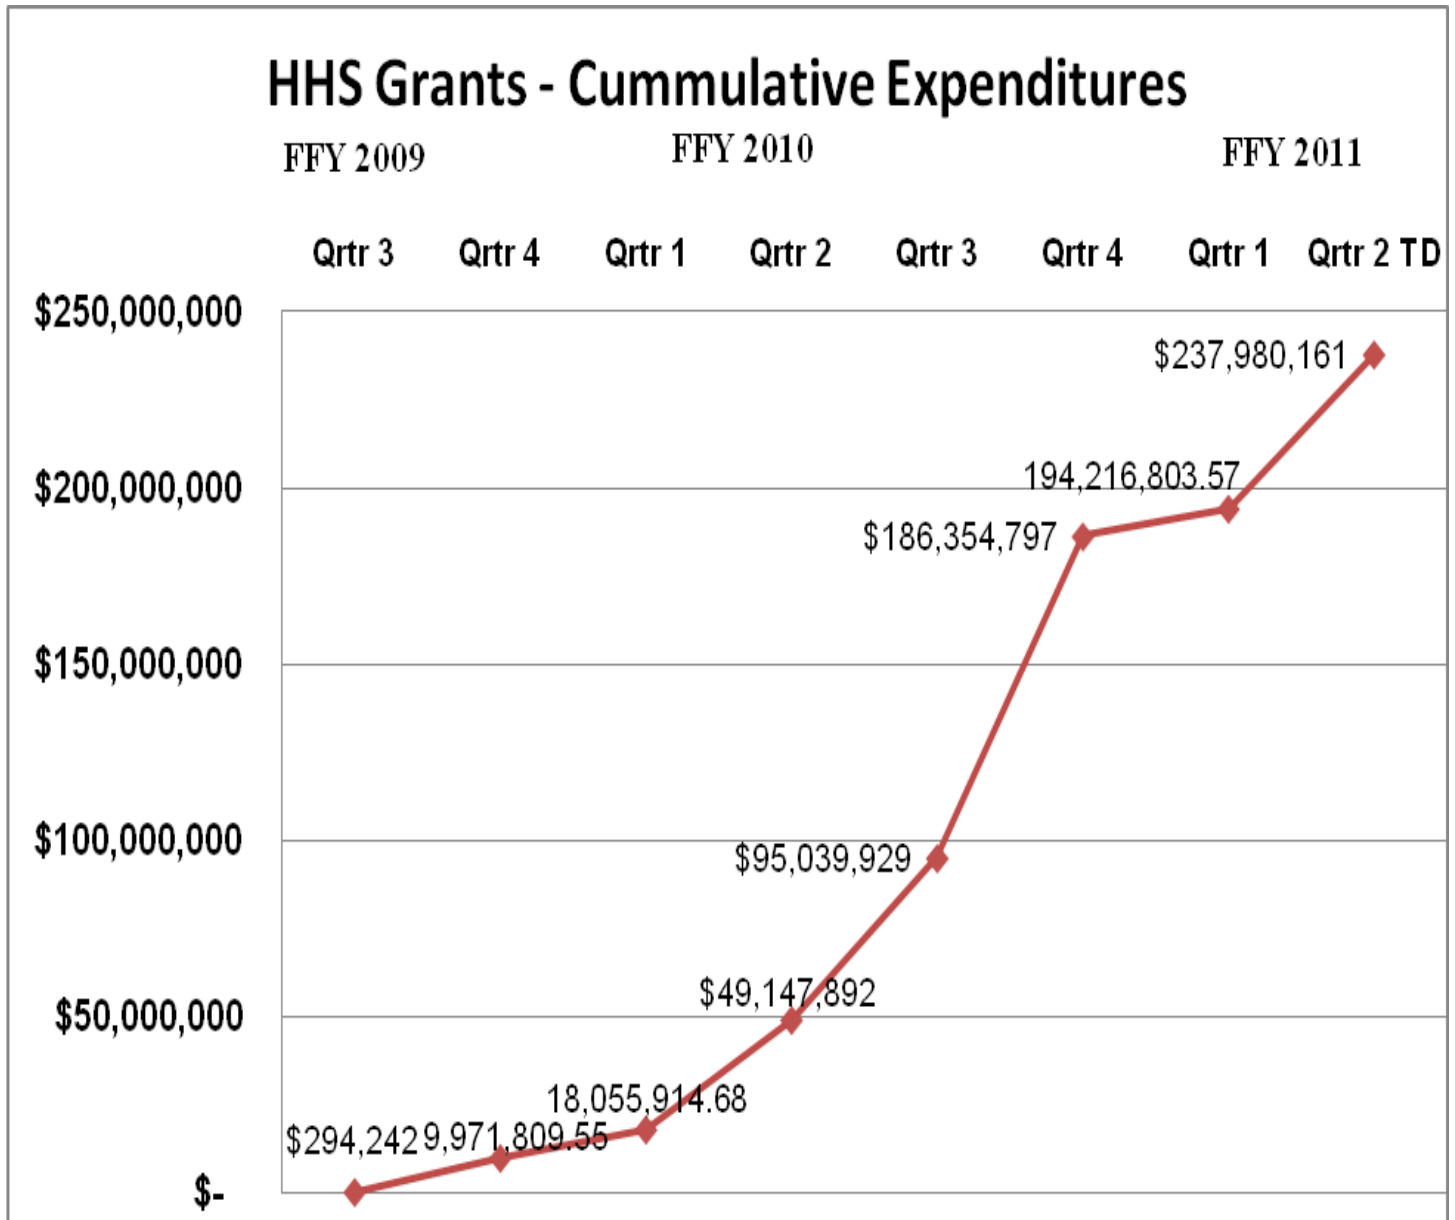

Figure 5. Rate of Expenditures by Federal Fiscal Year, DHHS

While some grant periods extend to 2014 and beyond, the ARRA funding to most programs will conclude by the end of 2011. These programs have had great impacts in North Carolina, including inoculating children against diseases, building and expanding health centers across the state, providing a safety net for the unemployed, elderly, and disabled, and funding innovative programs for community health.

Health and Human Services Current Program Status

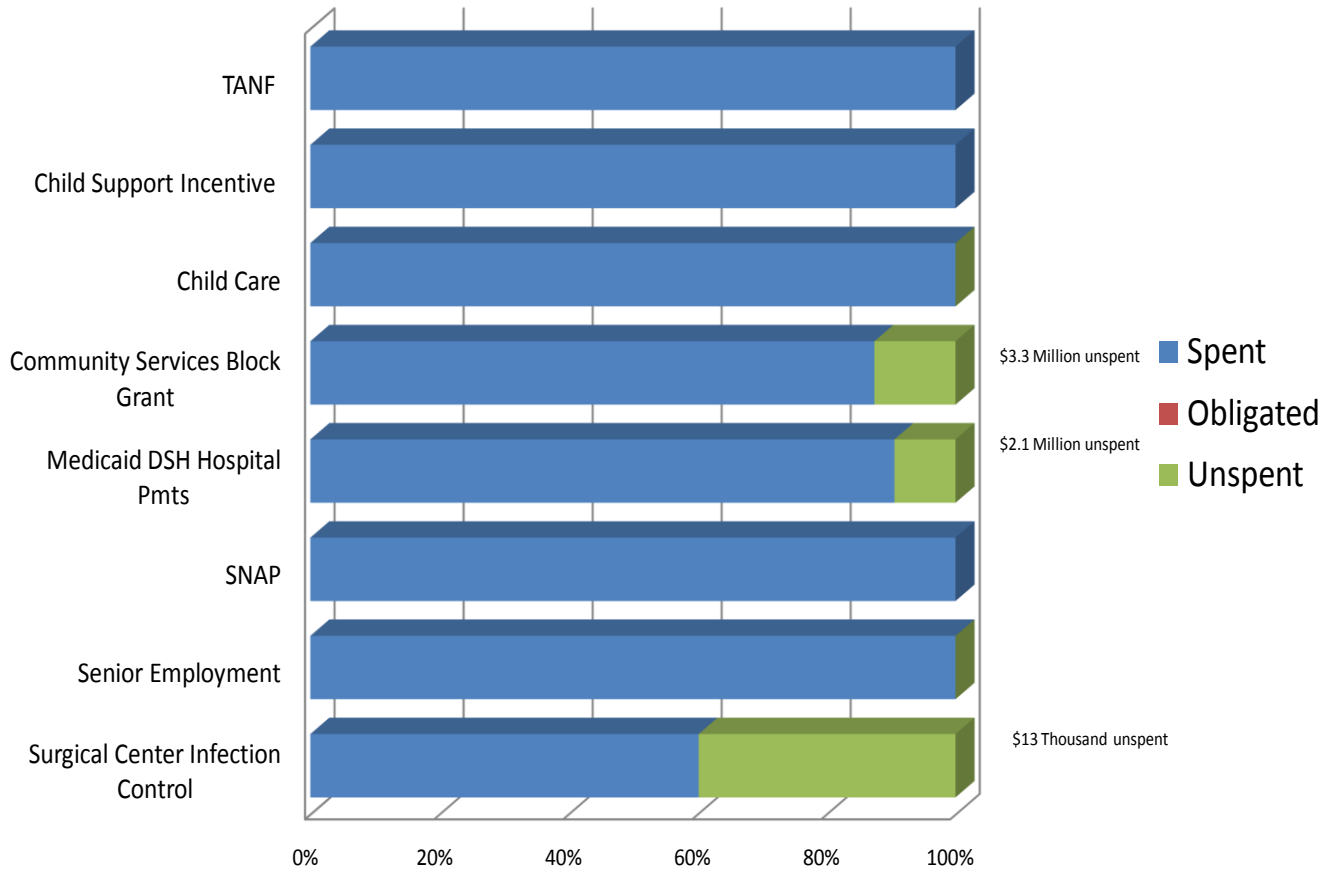

Figure 6, Sample HHS program status as of 2/2011

Columbus County Improves Access to Quality Health Care

The American Recovery and Reinvestment Act provided \$2 billion for investment in Community Health Centers nationwide, an unprecedented opportunity to serve more patients, stimulate new jobs, and meet the significant increase in demand for primary health care services among the Nation's uninsured and underserved populations. The Recovery funds were used in 2009-10 to support critically needed health care services, renovations and repairs and investments in health information technology in Community Health Centers.

Along with 26 other North Carolina Community Health Centers, Columbus County Community Health Services received Recovery funds through the Office of Rural Health and Community Care to meet an increased demand for services during the economic downturn and to make capital improvements to its clinic.

Columbus Regional Health Center Building

Columbus County Community Health Services received ARRA funding from two different programs: The Increased Demand for Service Fund and the Capital Improvement Fund.

Columbus County Community Health Services received \$333,608 in Increased Demand for Service grants. These funds supported a medical provider for two years. The funds directly enabled the medical practice to retain their only provider, a bilingual physician, who served more than 400 patients per month. The funds indirectly enabled the practice to retain six support staff, and hire an additional mid-level provider, who served an additional 200 patients per month.

Columbus County received \$400,000 for capital improvements to renovate their medical facility. This funding directly enabled the medical practice to move to a larger medical facility in a prime location and provided patients with unlimited parking, up from the previous facilities 15 spaces. The move provided space for increased visits from 600 patients to up to 1,000 patients.

Concord's Recovery-Funded Efforts to Reduce Blood Pressure

In Concord, North Carolina, the Southern Piedmont Community Care Plan used a \$15.7 million award to increase the number of patients with well-controlled blood pressure and lipids, and reduce the number of children with asthma that end up in the ER.

The award will fund electronic health record management and telemedicine equipment. Further, they will develop an indexed image repository to avoid unnecessary imaging, such as duplicate x-rays. This program could translate to 14,000 people with reduced risk of heart attacks and strokes and two percent fewer childhood asthma patients in the ER each year.

New Health Center in Harnett County

Like many communities across North Carolina, Harnett County had a large backlog of high-impact facility needs to accommodate a growing population. Harnett County and Harnett Health Services grabbed the unique opportunity the Recovery Act provided to put together a package to expand existing services across the county and fund a much needed new health facility.

Harnett County and Harnett Health Services were able to pool various ARRA-funded programs, including health center funding, the Community Facility grant and loan program, and Rural Development grants and loans worth more than \$66 million to open a new health center in Harnett County.

The Center will provide a 50-bed hospital for a growing rural community to greater access to health care. The expansion to Harnett County Health Services is projected to create an estimated 300 new jobs by the end of the project's third year.

North Carolina Fights Communicable Diseases

As part of the Recovery Act, North Carolina received \$3,828,625 worth of flu vaccines purchased by Center for Disease Control (CDC) with ARRA appropriations, and \$2,645,293 to administer the vaccines provided by CDC. The program was targeted to vulnerable populations to help prevent and curb the severity of communicable diseases. North Carolina immunized 157,014 children by establishing flu vaccine clinics in schools during the 2009-2010 flu season.

Recovery Act helps feed North Carolina's Hungry

USDA Commodity Assistance

The USDA's Food and Nutrition Service (FNS) provides nutritious foods to our nation's children and needy adults, while at the same time strengthening American agriculture. Because of the increased demand for commodity assistance during the recession, the ARRA increased funding for the Emergency Food Assistance Program (TEFAP). The program is not a grant program, but provides commodities to nonprofit organizations, such as soup kitchens and shelters, to use in preparing meals for the needy.

Through ARRA funding the USDA purchased commodities to remove surpluses from the marketplace and delivers them through the food distribution program in the State Department of Agriculture. NC Department of Agriculture, in turn, provided the commodities to schools and other outlets. Other nonprofit organizations, such as churches and soup kitchens, received around \$3 million in commodities due to this program.

Supplemental Nutrition Assistance Program (SNAP)

SNAP helped put food on the table for some 31 million people nationwide per month in FY 2009. It provides low-income households with benefits that can be used like cash at most grocery stores. SNAP is the cornerstone of the federal food assistance programs, and provides crucial support to needy households and to those making the transition from welfare to work.

The U.S. Department of Agriculture administers SNAP at the federal level through its Food and Nutrition Service (FNS). North Carolina administers the program at state and local levels, including determination of eligibility and allotments, and distribution of benefits. SNAP is not only a safety net program, but also provides a significant boost to local economies. For every \$5 in new SNAP benefits, up to \$9.20 is generated in total economic activity for local business. (Source: Effects of Change in Food Stamp Expenditures Across the US Economy/ FANRR-26-6 via USDA Supplemental Nutrition Assistance Program, 2009 Annual Report)

The ARRA increased the benefit available to SNAP beneficiaries. Since April 2009, \$447 million has been added to the North Carolina economy through this program. Using the noted multiplier effect, ARRA SNAP benefits have added \$882 million to local economies in the state since April 2009.

The Recovery Act assists workers and small businesses across North Carolina

Direct Assistance to Small Businesses

The Small Business Administration (SBA) and the Rural Development section of the USDA received Recovery Funding to aid small business. These funds took the form of several programs. The primary ARRA programs in the SBA were the Loan Guarantee Program and the microloan program. These assisted small businesses by facilitating loans to small businesses through securing credit by guaranteeing up to 90% of a loan from a lending institution. More than 2,500 businesses across 91 counties in North Carolina received loans guaranteed by funds from the ARRA through the SBA.

According to businesses receiving the assistance, the SBA contributed more than \$387 million in credit to North Carolina, allowing businesses to retain 9,900 positions and create more than 4,600 new jobs (NOTE: these positions are not reflected in our quarterly 'saved and retained' job figures).

Rural Development also funded several small business assistance programs under the Recovery Act. The Rural Business Enterprise Grant Program (RBEG) provides grants to economically distressed communities to create programs to assist small businesses.

Rural Development also contributed \$66 million in loan guarantees to North Carolina small businesses. The timely assistance of the Rural Development business and community programs helped keep several businesses open during the credit crunch of 2009-2010.

One of the businesses receiving benefits from this program was the Mortex Corporation of Wendell, NC. Founded in 1984, the Mortex Corporation oversees a large apparel manufacturing operation and has built up a workforce of over 300 loyal employees. In early 2009, the company was faced with a dire situation.

Despite a 15-year history of on-time debt payments, a lender opted not to renew the company's line of credit. Due to the economic downturn, credit markets were extremely tight. With hundreds of jobs on the line, the closing of Mortex would not only have devastated the company's workers and their families, but it would also have had a severe impact on the regional economy. Fortunately, that crisis was averted when Rural Development's Business and Industry program offered a guarantee for Capital Bank to make the loan to Mortex.

This guaranteed loan allowed Mortex to continue operations and maintain its workforce. Additionally, an affiliate dependent upon Mortex, HPM Apparel, was also able to continue operations and retain its 300 employees.

Linda Hayes, a production supervisor and 25-plus-year employee of the Mortex Corporation

In a letter addressed to USDA, Mortex President Edward Morrell expressed his gratitude,

“We will always be appreciative for this USDA program and the people of the USDA who made our loan possible. We have 600 employees in four small rural towns in North Carolina who benefit each week by being employed. Your USDA program guarantee saved these jobs and for that our family and our employees are very grateful.”

Critical funding from the Business and Industry Guaranteed Loan program, made possible by the Recovery Act, enabled 600 employees to stay on the job, keeping urgently needed dollars circulating in rural North Carolina.

Local Efforts to Create and Retain Small Businesses

Because of the scope of the Recovery Act, local governments had the ability to employ outside-the-box thinking when it came to assisting local small businesses. Some programs, such as the Build America Bonds and Recovery Zone Bonds (RZB) were created with economic development goals in mind. Several grant and loan programs added additional flexibility under the Recovery Act, to allow local governments to find partners and establish incubators for small businesses.

Rural Development also funded several small business assistance programs under the Recovery Act. The Rural Business Enterprise Grant Program (RBEG) provides grants to economically distressed communities to create programs to assist small businesses. Several communities in North Carolina received RBEG grants to establish small business funds, improve utilities for downtown areas, fund pilot projects, and facilitate other business development activities.

The City of Reidsville received an RBEG grant of \$75,000 to establish a revolving fund for small businesses. The revolving fund assisted in the renovation of the former Bank of Reidsville building into a commercial restaurant. The current tenant, The Vault Sports Restaurant, has been open for business since early 2011.

“The best that I’ve seen in Reidsville work here,” said William Knott, one of the Vault’s managers. The Vault Sports Restaurant employs approximately 60 full-time and part-time employees.

The Vault Sports Restaurant, downtown Reidsville

Recovery Zone Bonds

The Recovery Zone Bonds issued by the U.S. Treasury under the ARRA provided local government and private industry with a method of funding construction and improvement of facilities within issuer-designated “Recovery Zones.” RZBs issuance authority was allocated to 94 counties and seven municipalities in North Carolina.

One of the projects funded through a combination of RZB and state and local incentive programs is Packard Place in Charlotte. Packard Place was once a showroom for Packard Luxury Cars, now primarily a 90-year-old parking garage and building in downtown Charlotte. Husband and wife Dan Roselli and Sara Garces saw this five-story 90,000 square foot building as a future hub for entrepreneurship.

Using a combination of financing, including \$6.5 million financed through tax-exempt Recovery Zone Bonds, Packard Place is on its way to becoming the nexus of entrepreneurship in Charlotte. The purchase of the building is complete, and the renovation is underway. The plan is to convert parts of the building to common areas, including a ground-floor cafe and information center targeting the entrepreneur community, as well as a 200-seat assembly hall upstairs that Charlotte’s entrepreneurs can use for seminars and other meetings.

In addition to acting as a business incubator, Packard Place will host educational activities. These include job and internship fairs for graduating students, hosting field trips, classroom and seminar space for guest lecturers, group mentoring sessions with entrepreneurs, and community rooms and study areas.

The plan foresees colleges, investors, startups, support groups and other agencies using the building to foster new business and innovation. Packard Place's byline is: "Innovation. Entrepreneurism. Community."

"Successful entrepreneurs are able to evaluate the risk, the opportunity and then make a calculated bet," Roselli says. "This is a great time to make a bet. We believe in this region long-term."

"This all started when Dan and I had conversations about our legacy," Garces says. "It's great to have a successful business. But if you help other people and the community have additional successful businesses over time, you're leveraging your impact."

The Packard Place sign, Charlotte.

The renovated Packard Place building will be LEED compliant and Packard Place will create an estimated 60 full time jobs with an estimated 60 additional jobs for start-ups housed in the facility, once open.

Training a Better Workforce

The Workforce Investment Act (WIA) is the principal workforce development program administered by the North Carolina Department of Commerce, providing funds to address the employment and training needs of adults, dislocated workers and youth. WIA funds both the statewide [JobLink Career Center](#) system provides job seekers access to tools they need to assist in managing their careers, and through 24 local Workforce Development Boards (WDB) creates

unique local programs to target specific industries and geographical area. WIA also partners with Governor Perdue's JobsNow program to prevent unemployment, and provide for rapid retraining of currently unemployed North Carolinians. North Carolina received \$87 million in WIA funding for training and placement of displaced workers under the ARRA.

North Carolina used the WIA funding to help young workers gain much needed experience in the job market, to establish new programs to assist in retraining for displaced workers, and to help North Carolinians create their own small businesses.

JobsNOW "12 in 6" Initiative

The JobsNOW "12 in 6" Initiative was implemented by Governor Bev Perdue in 2009 to provide education and short-term occupational skills training to North Carolina residents as part of her overall economic recovery effort for the state.

Implemented by the Community College System, in collaboration with the Department of Commerce's Division of Workforce Development, \$13.45 million in ARRA/WIA funding was used to increase the training capacity of 57 community colleges to offer training in 12 occupational areas that could be completed in six months or less. Colleges could also offer additional training programs based on local demand. Local Workforce Development Boards also committed resources to help pay participants' tuition, fees, transportation, books and other related instructional materials.

A preliminary wage analysis of 11,454 program participants who were enrolled in "12 in 6" courses from Fall 2009 through the Summer of 2010, found 6,336 were placed in employment.

- At Isothermal Community College, 22 displaced workers were enrolled in the college's ARRA/WIA funded Pipefitting and Millwright program. In March 2010, 18 of the 22 students completed training and were immediately hired to work for various local companies like The Shaw Group, Appling Boring, DZ Atlantic, and Superior Machining.

In total, there had been 30 graduates of the Pipefitting and Millwright programs (through July 2010), who were enrolled in the local ARRA/WIA training program for adults and displaced workers. Twenty-nine of these enrollees were employed, many of them working for The Shaw Group.

- Evan Scott says, “The JobsNOW Behavioral Health Technician program gave me job skills that put me ahead of the pack compared to other applicants walking off the street. During the program, I received NCI Certification & First Aid/CPR Certification. In addition, I also earned a Gold-level Career Readiness Certificate, which also looks good to potential employers. This training helped me gain employment with HomeCare Management and it feels so good to be working again.”
- Margie Causby was hired as a Residential Advisor at Strategic Behavioral Center after completion of the Behavioral Health Technician program at Cape Fear Community College class.
- “I was hired as a Paraprofessional at Physicians Alliance Mental Health” says Nicole Obieglo. “This career training was helpful to gaining employment because I knew the [industry] terminology and it made me more confident in the interview. Also, the training I received through this program was looked at highly by my employer and they were flexible with my schedule so that I could complete the program.
- Kenny Jarrell, who graduated from the Plumbing Apprenticeship Training program, says “I was hired as the Building Maintenance Technician of my apartment complex because of the plumbing skills I learned in this course.”

Charlotte Area Workforce Recovery Project

WIA funding also allowed the UNC system to experiment with and develop small business incubators. Due to the potential for substantial worker layoffs in the banking/financial services industry in the Charlotte region, Governor Perdue charged workforce development partners at the state and local level to develop a proactive plan to assist workers impacted by layoffs and to assist the communities and existing businesses in the region to remain viable and competitive. The outcome of the planning was the Charlotte Workforce Recovery Project funded primarily with ARRA/WIA funds. Two innovations within the Charlotte Recovery project:

1. An innovative pilot project called BIZ BOOST, established in a joint effort of the Dept. of Commerce’s Business and Industry Division and the Charlotte office of the Small Business and Technology Development Center (SBTDC) affiliated with UNC Charlotte, promotes job retention/layoff aversion in the 12-county region by identifying struggling small businesses and providing them training and assistance in areas critical to business survival and success.

As of December 31, 2010, Biz Boost Charlotte has worked with 229 business clients, and this has resulted in 267 jobs created and 75 jobs retained. This layoff aversion model has since been replicated in other areas of the state.

2. FastTrac[®] NewVenture[™] Entrepreneurship Training: A partnership including the NC Division of Workforce Development, the Small Business and Technology Development

Center (SBTDC), and several community colleges in the Charlotte region administered an entrepreneurial training program for displaced workers who wanted to start their own business.

- 31 entrepreneurship training programs were offered from July 2009 – July 2010
 - 333 participants completed training, for a graduation rate of 85.4%. Twenty-nine participants became self employed by going into business for themselves.
- Preliminary data projects that these newly created businesses hired up to 20 citizens to work for their companies.

Success Stories of Graduates of the FastTrac[®] Program

- After 30 years in the furniture industry, Rick Moose was laid off when the economy took a turn for the worse. In December 2009, Rick graduated from the FastTrac[®] NewVenture[™] program at Catawba Valley Community College. Now he and a partner are co-owners of the Hickory Outlet Center which represents 10-12 local furniture manufacturers by providing a showroom and a sales staff to help them move their market samples and discontinued items. In addition to the two full-time partners, the company has hired two full-time employees and one part-time employee in the past year.
- Savory Moments, a gourmet catering shop that offers a variety of decadent sweets as well as dinners-to-go, opened in August 2009 in North Charlotte. Jodi Wright, who co-owns the shop with her sister, Heather Scovel, graduated from Central Piedmont Community College's FastTrac[®] NewVenture[™] program in July 2009. Jodi moved to North Carolina after being laid off from her job with a transportation company. Savory Moments has now expanded to a second location, has hired three part-time employees, has successfully completed a government contract and is currently fulfilling a contract to provide a healthy option for school lunches.

An example of products available from Savory Moments.

North Carolina aids first responders, employs new Cops, funds new equipment, and assists Public Safety Programs

CHARLOTTE puts COPS to work.

The Community Oriented Policing Services Grant (COPS) is a national competitive grant established by the U.S. Department of Justice. COPS funding provides training and technical assistance to community members and local government leaders and all levels of law enforcement. North Carolina received \$30,956,114 in COPS funding, which represents 202 officers in 50 communities.

The Charlotte-Mecklenburg Police Department took advantage of this program, and was able to place 50 new officers with Recovery Funds. These officers will have jobs and benefits for the next four years thanks to the grants. Fifty more officers are on the street protecting the Charlotte-Mecklenburg community because of the Recovery Act.

Attorney General Eric Holder attended the graduation ceremony for the 158th recruit class for the Charlotte-Mecklenburg Police Department. The Attorney General met and shook hands with the graduates prior to the ceremony to welcome them to their new careers in public safety.

Attorney General Holder shakes hands with a graduating officer in Charlotte. Photo by Lonnie Tague for The Department of Justice.

At the ceremony, the Attorney General addressed the audience:

“Today, I’m honored to join Chief Monroe in welcoming 51 new additions to this team, and I want to thank you for inviting me to participate in today’s ceremony.

As we commemorate this milestone and honor these graduates, all of us should pause and reflect on the fact that, without the historic investment of last year’s American Recovery and Investment Act, which was signed into law one year ago this week, we wouldn’t be here today. That’s because 50 of the 51 police jobs being filled by today’s graduates were created through this legislative effort. Without the Recovery Act, the public safety needs and challenges these graduates will soon address here in the Charlotte-Mecklenburg area may have gone unmet”.

These grants also included 25 new officers in Winston Salem, 13 in Wilmington, 17 in Fayetteville, and eight new officers in both Gastonia and Rocky Mount. In order to help leverage the efficiency of these programs, Governor Perdue set aside \$400,000 of state ARRA funding to help pay for uniforms and equipment for local governments with COPS-funded positions.

North Carolina Funds Crime Prevention

Justice Assistance Grants (JAG) is a recurring federal program. The Governor’s Crime Commission distributes grants competitively on an annual basis to state, local, and nonprofit entities. In 2009 JAG grants were funded through the Recovery Act, and North Carolina received \$34.5 million to distribute.

One project funded through ARRA JAG was the Bladen County Safe Communities initiative. The Safe Communities program is a county-level law enforcement program aimed at incorporating multiple law enforcement and community partnerships and sharing methods and information to curb gang violence.

Bladen County received \$74,000 to support this initiative. The Elizabethtown Police will use this grant to address the rise in gang activity and violence in the county and will receive training and technical assistance opportunities (conferences, teleconferences, and webinars) with UNCG and the John Jay School of Criminal Justice in 2011.

A mentoring program and a gang prevention/intervention program for at-risk youth will also be implemented with these funds.

Elizabethtown Police Patch

Fighting Fire in North Carolina

Law enforcement and crime prevention weren't the only public safety functions funded through the Recovery Act. Other first responders received target programs to enhance public health and safety. Several communities in North Carolina received FEMA Fire Station Construction Grants funded through the Recovery Act. Among those receiving grants was the Navassa Volunteer Fire Department in Brunswick County, North Carolina.

The Navassa Volunteer Fire Department received a grant worth \$1.6 million to replace an undersized 20-year-old prefab building with a larger modern fire station more than three times the size of their previous facility.

The 23-member volunteer department provides emergency fire and medical services to a rural community of 1,870. The 11,700-square-foot facility will improve service to the community. The new station will also have enough room to serve as an emergency operations center and hurricane shelter during hurricanes.

The new Navassa Fire Department facility

Wildfire Safety Grants

The US Department of Agriculture Forest Service and the Department of the Interior used Recovery Act money to help prevent wild fires by contracting with North Carolina. North Carolina used these grants to reduce hazardous fuels and increase forest health protection, for forest rehabilitation and hazard mitigation activities on federal lands, and to supported state and private forestry activities, including hazardous fuels reduction, forest health and ecosystem improvement activities. Additionally, wood-to-energy grants were awarded to promote increased utilization of biomass from federal, state and private lands.

Additionally, the USDA, through the North Carolina Department of Environment and Natural Resources, worked with 33 counties containing 110 fire districts to create or update emergency and hazard mitigation plans. Three hazardous mitigation managers will be hired (one for each geographic region) to prioritize projects, package fuel mitigation work, locate contractors and submit bid packages. The managers will also oversee the work for quality, environmental regulation compliance, data collection, and report writing.

Franklin County Makes the Most of ARRA Opportunities

The Community Facility Grant Program allowed local governments to apply to USDA for a mixed grant and loan funds to improve critical community infrastructure.

Franklin Community Volunteer Fire Department located in Mt. Airy, NC, received \$1.5 million in Community Facility Loans to repair and upgrade an existing building to serve as their new Fire Station.

The renovations, which included electrical, HVAC, floor covering, painting, carpentry, plumbing, paving, and garage door installations, are fully completed, putting more than 15 local tradesmen to work over the course of six months.

The building has been fully occupied and is now in service.

The Recovery Act helps people find homes

USDA Rural Development Single Family Housing Program

The USDA Rural Development Rural Housing Service (RHS) is a program that for 75 years has supported single-family home ownership as a way of improving lives, creating jobs and economic opportunities, and strengthening America's neighborhoods. The Single Family Housing Program in Rural Development supports rural homeowners by financing critical home repairs and by helping income-eligible Americans achieve their housing goals through grants, loans and loan guarantees. With funding made available by the Recovery Act through its Single Family Housing program, RHS enabled more than 92,000 rural residents to become homeowners nationwide.

USDA Rural Development used this program to support almost 5,500 loans, loan guarantees and grants across almost every county in North Carolina. These actions had a value of more than \$729 million. These investments, along with the additional programs, made North Carolina the top recipient nationally of ARRA Rural Development funding.

Homelessness Prevention and Rapid Re-housing Program

The ARRA was established in early 2009 after an economic downturn caused by a collapse in the housing market. As the economy slowed and the job market shrunk, the recession worsened as more people became unemployed or the unemployed could not find jobs and some began to lose their housing.

One of the few new programs in the Recovery Act was the Homelessness Prevention and Rapid Re-Housing Program (HPRP). Based on existing best practices nationally, the HPRP had two major goals: Prevent homelessness for households at greatest risk of becoming homeless, and quickly re-house those who become homeless.

The North Carolina HPRP is a pilot three-year \$22 million program, with 20 regional partners. These geographically diverse partners provide case management and outreach to homeless people and those at imminent risk of homelessness, and provide flexible financial assistance to enable households to become or remain housed. These funds are available for rental assistance (including back rent for months where the household has been unable to pay), utility deposits, security deposits, and/or moving costs. North Carolina is seen as a national model for this program.

As in many ARRA programs, large municipalities received additional flexibility from the primary state-run program to implement regional-specific programs. In Charlotte, where unemployment in the metro area reached 12.8% in January 2010, HPRP funds were used to create Project HOPE, a unique county-wide program to provide comprehensive housing-based services to households experiencing, or at imminent risk of, homelessness around a "Critical Time Intervention" (CTI) model.

CTI focuses on an intensive time-limited case management model to prevent or move a family out of homelessness. The model focuses on emphasizing and supporting linkages to community services, family and friends for a period of up to 12 months, with weekly visits for the first three months of enrollment in the program and bi-weekly for up to 12 months. By utilizing existing support networks, nonprofits, and volunteer teams, the Charlotte area program is able to employ an ‘army’ of more than 500 volunteers headed by five full-time HPRP social workers, and two HPRP housing coordinators.

For individual families, HPRP can have a profound impact on both the individual and the community. The following case studies have been collected by the regional partners from participants in the North Carolina Homelessness Prevention and Rapid Re-Housing Program (please note, due to the nature of the program the names of the participants have been changed).

In Wilson County, Jane lost her temporary employment in late 2009. Because Jane had been employed through a Temp Agency, she was not eligible for unemployment benefits. When she entered the HPRP through the Wilson County Department of Social Service a month later, Jane was still unemployed, facing eviction, and owed more than \$1,000 in back rent and utility payments.

Wilson County DSS was able to assist her with her overdue bills. Program staff also referred Jane to the in-house Work First Job Center, who assisted Jane with training, and job searches. In February 2010, Jane gained full-time employment in a bank and has since exited the Wilson County program.

The Wilson County DSS Logo

Another case study from the Wilson HPRP is the Smith family. The Smith family had been staying at the Ronald McDonald House in Chapel Hill for two months, because their child had been badly burned. While at the hospital the Smith family was evicted from their home, and their landlord disposed of all of their personal items.

The Smith family had a history of mental health issues, frequent work changes, past due bills and evictions. The Wilson HPRP assisted the Smith Family in finding a landlord, rental deposits and paid outstanding bills. The program helped Mrs. Smith with finding mental health services, assisted her in finding a car, and gave her job skills training and personal finance training.

The Smith family has now moved into a new unit at their own expense. They have their own car, and have taken on an additional roommate to help with bills. Mrs. Smith is receiving medical assistance for her condition and that of her child. The Smith family has been current on all bills for several months, thanks to their financial training and Mr. Smith’s new full-time job.

North Carolina invests in Critical Infrastructure

One of the goals of the Recovery Act is to improve infrastructure that is either inefficient or in need of repair. Usually, when people think of ‘infrastructure’ they think of state-maintained highways and bridges. However, there are several layers of critical infrastructure built, maintained and improved by the Recovery Act that are rarely seen but just as important to everyday life.

Water and Sewer Projects

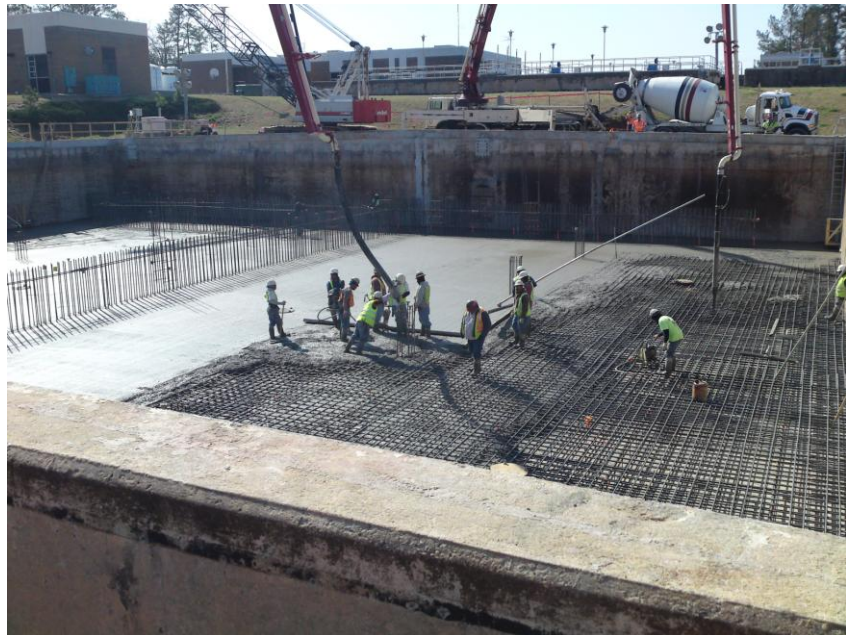

The Recovery Act provided more than \$136 million for local water and sewer projects through the North Carolina Department of Environment and Natural Resources revolving fund program. More than \$70 million of this fund was in the wastewater program and more than \$65 million in the drinking water program. This program funded more than 100 projects across the state, and saved or retained more than 1,100 jobs.

One of the projects funded was the Sanford clearwell rehabilitation and replacement program. A ‘clearwell’ is a holding tank that allows treated water exiting a plant time to disinfect. Sanford’s clearwell was in need of rehabilitation, and the roof of the facility needed replacement. Sanford applied for ARRA funds to make these repairs and other improvements to increase efficiencies.

Once the program started, it was discovered that the floor of the clearwell was leaking, and needed to be repaired. Using Recovery funding, Sanford was able to repair the damage to the facility, complete the original improvements and significantly improve the operation of the plant.

If the flaw in the plant had not been discovered, and the Sanford Water Treatment plant was forced to close for repairs, all 43,650 people served by the plant would have lost water.

Additionally, without the available funding to repair the clearwell, the town would have been forced to boil water as a precaution against infection, and the plant may not have been able to meet peaks for water demand.

Work crews repair the floor of the clearwell in Sanford

Airport Upgrades

Air travel has been critical to the healthy functioning of America and of North Carolina's economy. The Recovery Act provided funds for safety, security, and operation of several airports in North Carolina.

Charlotte's Douglas International Airport received more than \$45 million for a new state-of-the-art inline baggage screening system and an additional \$290,000 to replace a lamp monitoring system.

Piedmont-Triad Airport received more than \$5.5 million to increase safety by constructing a new aircraft rescue and firefight building and purchase a new vehicle. Greenville Airport Authority received almost \$8 million to construct a new terminal building addition, including a lobby and a new departure lounge.

Charlotte Douglas International Airport

Smart Grid

Smart Grid technology allows for smarter and more efficient use of energy, by increasing the transparency, measurement, and control of energy used on both the supply and demand side. Through automated sensors and controls as well as dynamic pricing, this intelligent infrastructure will make the electric system more reliable, empower consumers and utilities to use energy more wisely, help manage peak demand, enable larger scale use of renewable energy and electric vehicles, and reduce U.S. dependence on oil. Smart Grid allows utilities to significantly reduce service interruptions and the associated economic losses, which is important to both consumers and the economy.

The Recovery Act is accelerating the deployment of 21st century Smart Grid technologies in America's electric infrastructure. The U.S. electric grid was not designed for today's energy-intensive economy or increased electricity trade. A smarter grid can help utilities reduce service interruptions and the associated economic losses. For example, smart technologies are capable of detecting events, such as a line down due to a fallen tree, and then alerting operators or triggering automatic responses. By improving the reliability of power, health and safety threats are lessened, economic losses are reduced, and quality of life improves.

Progress Energy received a \$200 million grant to perform smart grid upgrades across their service area in North Carolina.

North Carolina put Recovery Act funds to work for Education

A focus of the Recovery Act was to stabilize state and local governments, and to preserve essential services. Education was considered an ‘essential service’ and several funding programs were dedicated to preserving jobs at local schools, targeting at-risk students, and providing North Carolina with the tools to expand education for citizens.

Education Stabilization/Education Jobs Funding

The Education State Fiscal Stabilization Fund (SFSF) was newly created funding in the Recovery Act to allow governors flexibility in order to minimize reductions in education.

North Carolina was awarded \$1.16 billion in Education Stabilization funds to be expended over the state fiscal years of 2008-09, 2009-2010, and 2010-2011. In fiscal year 2008-09, Education Stabilization and Government Services funds totaling \$344.3 million were used for payroll obligations in May and June 2009. Without the additional funds, North Carolina would not have had the cash necessary to meet payroll obligations in May and June 2009.

To help maintain education services when the state was facing reduced revenues due to the recession, state funds were temporarily reduced and offset by the Educational Stabilization fund. In local public schools, funding for support personnel (custodians and clerical positions) for state fiscal year 2009-11 was replaced.

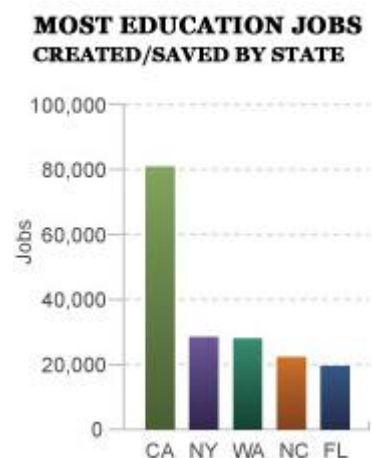

Figure 7, Education Jobs created by state. Source: www.recovery.gov

A similar transfer of state funds for Stabilization Funds was made in the UNC system, where funds were used for the November and December 2009, and January and February 2011 instructional payroll.

Governor Beverly Perdue submitted a plan to use the SFSF education funding for payroll in order to preserve local school positions. As the SFSF funds began to run low, Congress reallocated ARRA funds to establish the Education Jobs Fund. The ‘Ed Jobs’ program is designed to mimic the SFSF funding, and save or create education jobs for the 2010-2011 school year. Funds could be used only for obligations after August 2010 and remain available for obligation through September 30, 2012.

Ed Jobs funds are distributed on the same formula as the Education Stabilization funds, and will be used only for school-level positions. North Carolina will receive \$298.5 million in Ed Jobs funding.

School Bonds

The Recovery Act provided local schools opportunities to build, repair, expand and renovate existing school facilities through newly created bond programs. The Qualified School Construction Bonds (QSCBs) can be used for construction/repair/renovation of public school facilities or for land acquisition for a public school facility. These bonds are subsidized through tax credits to bond holders, and any construction paid for by QSCBs must be completed within three years. The Qualified Zone Academy Bonds (QZABs) can be used for school renovation, repairs, and wiring and infrastructure improvements related to providing technology, but not new construction.

To qualify for QZABs, schools must have a minimum of 35 percent of students eligible for free or reduced-price school meals or be located in an enterprise community or empowerment zone. The QZABs are structured so eligible schools are paying zero or minimal interest on these bonds.

As of March 2011, LEAs (Local Education Agencies) in 50 counties received approval to issue QCSBs and QZABs, with 34 counties having issued bonds totaling \$287.6 million.

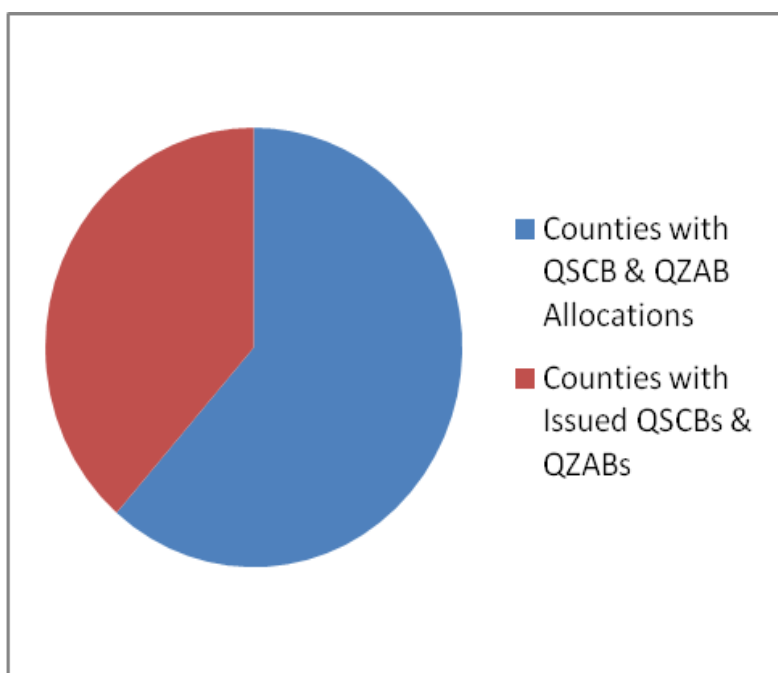

Figure 8: County allocation and use of Q Bonds

Franklin County Expands Educational Opportunities

At Louisburg High School, there were \$3.6 million in additions and renovations that were part of QSCB bonds. As part of the construction project at Louisburg High School, new facilities included a new ten-classroom building, a building for the freshman class as a way to create academic growth in teams, a new weight room for physical education and athletic use, and a new Career and Technical Education shop built to expand course offerings.

According to Jon Long, school system architect, there were approximately 150 construction workers/positions from C.T. Wilson Construction in Durham that were involved in the construction project.

Franklin County
Finance Officer Chuck
Murray estimates that
Franklin County will
save approximately
\$590,000 in interest
over the 20-year life of
the bonds.

Fred Carter, Franklin
County Schools
Finance Officer, stated
that due to the stimulus
funds received,
Franklin County
Schools was able to
save 71 positions.

Louisburg High School

Voters in Franklin County had already approved the \$53 million in bond funds in May 2008, and were in position to take advantage of the unique opportunities for the Recovery Act Bond programs. Franklin County Schools has saved Franklin County approximately \$10 million in construction bond funds due to the timing of the bidding process.

Competitive Grants - Education

Preserving essential services and jobs in schools was not the only education-related goal for the Recovery Act. Building the 21st century economy by investing in new infrastructure, new technologies, and educating tomorrow's workforce was also a targeted result of the ARRA. Federal agencies, funded by the Recovery Act, awarded competitive funds to states, universities, and individuals to support innovative practices for effective comprehensive educational reforms and transform education for decades to come.

Race to the Top

The ARRA established a new innovation-in-education program called Race to the Top, a \$4.35 billion competitive grant program designed to encourage and reward states that are creating the conditions for education innovation and reform; achieving significant improvement in student outcomes, including making substantial gains in student achievement, closing achievement gaps,

improving high school graduation rates, and ensuring student preparation for success in college and careers.

“Race to the Top in the most meaningful reform of our public schools in a generation. For less than one percent of what we spend on education each year, it has led over 40 states to raise their standards for teaching and learning...and Race to the Top should be the approach we follow this year as we replace No Child Left Behind with a law that’s more flexible and focused on what’s best for our kids.”

President Obama, 2011 State of the Union Address

The Race to the Top program encouraged states to submit programs to advance educational reform around four specific areas:

- Adopting standards and assessments that prepare students to succeed in college and the workplace to compete in a global economy
- Building data systems that measure student growth and success, and inform teachers and principals about how they can improve instruction
- Recruiting, developing, rewarding, and retaining effective teachers and principals, especially where they are needed most
- Turning around the lowest-achieving schools

North Carolina submitted applications during both the Phase 1 and Phase 2 grant application periods. While we only made it to the final round of review in Phase 1, North Carolina was awarded \$399.5 million over a four-year period in Phase 2.

Of this amount, half is for state-wide program implementation and half would go to LEAs and Charter Schools. The award is effective as of September, 2010.

Under Race to the Top, states are advancing other areas of reform. They are creating models of how to recruit, train and evaluate teachers and principals. North Carolina will provide incentives to draw teachers to the schools where they are most needed — offering to pay for graduate education and housing. Other states are doing the tough work of turning around their lowest-performing schools, and they are developing data systems to track and report progress...All Race to the Top states have created comprehensive plans to prepare students for success in science, technology, engineering and mathematics — the fields that will be vital for success in the 21st century economy.

Arne Duncan, Secretary of the Department of Education

Research Grants

Building the 21st century economy is one of the goals of the American Recovery and Reinvestment Act. To that end, the Act invested money in various research funding institutions, such as the Department of Energy (DOE), National Science Foundation (NSF), and the National Institutes of Health (NIH).

North Carolina is fortunate to have several internationally renowned research institutions and innovating industries in the state. UNC system institutions submitted applications for more than a billion dollars in proposed research grants during Recovery Fund availability. All research grants are either won competitively by applicants or were previously-submitted applications that are being funded by increases in ARRA funding. Awarded grants range in subject from experimental medical investigations to lab equipment, and include new cancer treatment methods, studying economically important environmental resources, studying new educational methodologies. Outreach and training for new industries is also addressed through research funding.

North Carolina entities received nearly \$1 billion in research grants from DOE, NSF and NIH. This includes more than \$150 million for Duke University, \$135 million for UNC, \$40 million for Wake Forest University, and \$30 million for NCSU.

RTI received more than \$170 million for various advanced energy and carbon capture research projects. Celgard, a Charlotte are company, received a \$48 million research grant to development high-capacity battery for use in electric vehicles. Chemetall Foote Corporation, in Cleveland County, received \$28 million to expand their lithium-Ion battery development, and has recently announced improvements in both product development and industrial processes.

Pell Grants

The Federal Pell Grant Program provides need-based grants to low-income undergraduate and certain post-baccalaureate students to promote access to postsecondary education. Grant amounts are dependent on: the student's expected family contribution; the cost of attendance (as determined by the institution); the student's enrollment status; and whether the student attends for a full academic year or less. Unlike student loans, Pell Grants do not have to be paid back, lessening the amount of debt for a graduate.

The ARRA allocated \$17.1 billion to the Pell Grant program, which was available in the 2009-2010 school year, and also backfilled grants from the previous year. The maximum available amount for Pell Grant-eligible students was increased from \$4,850 to \$5,350. ARRA funded Pell Grants were available for students who attended community college and four-year universities, and for eligible individuals to receive grants to attend vocational and professional retraining schools. More than 125 institutions in 67 counties received Pell Grant attendees.

The Ongoing Impact of Recovery Funds in North Carolina

Since its inception in February 2009, the American Recovery and Reinvestment Act has invested approximately \$16.5 billion in economic impact in North Carolina in new bond capacity, grants, contracts, benefits, and loans/loan guarantees. In the months ahead, OERI staff will focus on monitoring Recovery activity and ensuring that the benefits of these new projects are reaped by North Carolina residents now and in the future. While the full economic impact is not yet quantifiable, the direct impact is shown in the approximately 25,000 jobs created or saved as a direct result of Recovery Act Investments, with many more employed through indirect effects, training, education, and Recovery-funded programs. These investments lay the groundwork for continued job creation years into the future.

As required by law, and by mandate from Governor Perdue, OERI will continue to ensure transparency and accountability in the use of ARRA monies. North Carolina quarterly reports will continue to be posted on www.ncrecovery.gov, along with Recovery-related announcements, news, and policy and program information. A notice of any use of Recovery Funding for the purchase of goods and services by a state agency or local government in excess of \$5,000 will continue to be placed on the state Interactive Purchasing System (IPS) at <https://www.ips.state.nc.us>. North Carolina's quarterly 1512 report can be downloaded in its entirety in multiple formats at the download library at www.recovery.gov. Additional tools for sifting related information, reviewing awardees, and checking on the status of Recovery-funded projects can also be found on the website. OERI staff will continue to oversee the progress of various projects until they are completed.

While these Recovery Act funds, as administered through North Carolina's wide variety of programs, had a very real and positive impact on rural areas across the country, we know that our mission continues. As demonstrated by the unprecedented number of calls, emails, and outreach events, there remains a tremendous need among underserved, economically challenged communities for new and improved infrastructure, broadband, business assistance, and affordable housing. The State of North Carolina is committed to a continued partnership with local communities to build upon this foundation for future economic growth and to realize our vision of a state that is vibrant, thriving and self-sustaining.

Appendix

American Recovery and Reinvestment Act Total Spending by Funding Category (1512 Report, Q4 2010)

ARRA Funding

Transfer Payments \$3,901,270,174

Supplemental Unemployment Benefits and Administration \$3,488,279,174

One Time SS Economic Recovery Act Payments \$412,991,000

Budget Stabilization \$3,803,969,729

*Due to the way the data is organized on the OERI awards table several statewide programs, such as the water and sewer programs and various block grant programs, are listed in Wake County, since that is where the distributing state agencies are located.

**Contracts refer to a Recovery Act funded contracts with a federal agency or entity, such as work on a federal building or military base, not a state-level competitive contract for good or services, such as NCDOT contract for road widening.

***Statewide Programs are distributed across all counties by eligibility (for entitlement programs, such as SNAP and Unemployment), by formula, or in a competitive process. SFSF Education State Grants were distributed to all public school systems on a formula based on student enrollment.
